

CORGI LEVEL 2 VRQ AWARD IN GAS SAFETY AWARENESS FOR TOUR OPERATORS

Raise your team's awareness of gas safety and carbon monoxide poisoning with a professionally recognised qualification.

Why your staff should take this course

Gas safety and carbon monoxide poisoning awareness in the tour operator sector is crucial.

INFORMED

Tour operators are being urged to increase staff knowledge, awareness and commitment to managing gas safety abroad.

SAFETY

Keep your customers safe on holiday.

REPUTATION

Demonstrate your commitment to customer safety.

EXPERTS

With over 40 years of experience you can be confident your training will be delivered by highly experienced experts.

Who is this course for?

This course is designed specifically for tour industry staff who are in the front line of gas safety every day, in roles such as Overseas Representatives, Destination Managers, Surveyors, Maintenance Operatives, Call Centre Staff and Gas Admin Staff.

CORGI LEVEL 2 VRQ AWARD IN GAS SAFETY AWARENESS FOR TOUR OPERATORS

A complete training course delivered in one day with an experienced Gas Expert from CORGI Technical. The course is completed by a written assessment on the day consisting of multiple choice questions and short answer questions.

The following essential modules will be covered:

Carbon Monoxide (CO) awareness

An explanation of how CO is produced, what it does to the body and how to recognise the symptoms of CO poisoning

Carbon Monoxide Detection

Understanding the safety measures that can reduce the risk of carbon monoxide poisoning

Safe Gas Appliances

Identifying good combustion and unsafe appliances/installations

Characteristics of Combustion

An overview of how gas behaves if it leaks and how it burns safely

Ventilation and Flueing of Appliances

Get to grips with the reasons why different appliances found in accommodation sites require ventilation

LPG Storage and Supply

Understand the design, installation and operation requirements of LPG bulk storage and cylinders

Management Responsibility and Emergency Procedures

How to prevent, respond and deal with gas and carbon monoxide and other fuel related emergencies

The qualification, training and assessment have been accredited by EAL
